

Cyber Security Internship - Task 6

Create a Strong Password and Evaluate Its Strength

Objective:

Understand password strength and evaluate passwords.

Sample Passwords:

1. password123 (Weak)
2. Welcome@2026 (Medium)
3. T!ger#Sky9\$River2026 (Strong)

Observations:

- Longer passwords resist brute-force attacks better.
- Mixing uppercase, lowercase, digits and symbols improves strength.
- Passphrases are memorable and secure.
- Use MFA and password managers.

Conclusion:

Strong, unique passwords greatly improve account security.
